

AGELESS IMAGE WELLNESS AND BEAUTY

AFTERCARE INSTRUCTIONS FOR NEUROMODULATORS

INCLUDING BOTOX COSMETIC AND DYSPORT AND JEUVEAU:

Remain with head elevated for minimum of 4 hours following treatment.

Limit physical activity for 24 hours. No strenuous exercise.

You can have some tenderness at injection site as well as some bruising. Both will resolve in a few days and you can take Tylenol or use Arnica gel topically for discomfort.

For the first 24 hours avoid taking NSAID medications like Motrin, Aspirin, Aleve or Ibuprofen. Avoid alcohol as well. These drugs can increase the bruising.

DO NOT rub or massage injection sites, including while washing the injected area, this can cause the medication to diffuse outside the target area.

Stay out of the direct sun and avoid wearing hats for 24 hours.

Your neuromodulator can take, for Botox, 3-14 days to become totally effective. Dysport, 3-5 days for full effect. The effects last 3-4 months before re-injection.

Return to Ageless Image for follow-up appointment in 2 weeks. This is a very important and complimentary part of your treatment, it helps to perfect your recipe and ensure satisfaction with your care.

The raised areas surrounding the injection sites will resolve in 15-60 minutes. You can apply ice to the areas as needed for discomfort.

Call our office if you can't fully open your upper eyelid or if you notice asymmetry of your brows or facial expressions prior to your follow-up appointment. We can help.

THANK YOU FOR CHOOSING AGELESS IMAGE TO CARE FOR YOU TODAY! WE APPRECIATE YOU AND LOOK FORWARD TO HELPING YOU ACHIEVE YOUR GOALS.

PURSUING BEAUTY THAT IS MORE THAN SKIN DEEP
