

AGELESS IMAGE WELLNESS AND BEAUTY

AFTERCARE INSTRUCTIONS FOR

DERMAL FILLERS:

There can be bruising at injection sites for up to 2 weeks. Ice and Tylenol can be used for discomfort. Avoid alcohol, NSAIDS like Motrin and Aleve, and Aspirin for 24 hours at least.

DO NOT USE ICE IF YOU WERE TOLD IN THE OFFICE TO AVOID IT.

DO NOT RUB OR MASSAGE the areas injected today.

Use gentle cleanser and pressure while washing for 2-3 days following treatment.

Some dermal fillers are more “WATER LOVING” than others so swelling will vary based on product used. You can expect 3-4 days of swelling on average. If you were told in the office to avoid ice PLEASE avoid it. It can cause increased swelling with some products. If possible, sleep with your head elevated on two pillows tonight.

If you notice an area that appears “white” or bruising that looks like “giraffe spots” near an injection area, call the office immediately as this can be a sign of a serious and treatable side effect. Or if you notice areas of significant discoloration and pain, visual changes or other changes, please call right away or visit the closest Emergency Department.

If not done at the time of treatment please call and book your two week follow-up appointment. This is complimentary and we would love to see you and make sure you are fully satisfied with all of your care. It’s our job to do our best to make sure you are happy with your results.

THANK YOU FOR CHOOSING AGELESS IMAGE TO CARE FOR YOU TODAY! WE APPRECIATE YOU AND LOOK FORWARD TO HELPING YOU ACHIEVE YOUR GOALS.

PURSUING BEAUTY THAT IS MORE THAN SKIN DEEP
